Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 October 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-12 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Aime (6467138) as presented in the last office action, mailed July 14, 2005.

Aime discloses a matching layer 20 containing a plurality of conductive elements 22 therein that extend from the top to the bottom of the layer. The elements can be cylindrical. The elements are connected to conductive layers 18,22. At least some of the connection are located toward the edge of the layer. Refer to figures 4, 5a-d, 6a-d,g,f and column 3, lines 28-31, column 4, lines 1-31, column 5, lines 49-64 and column 6, lines 13-39.

3. Claims 1-10, 12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Corbett et al (6266857) as presented in the last office action, mailed July 14, 2005.

Colbertt et al teaches a matching layer that has holes there through and is then plated with a metal conductor that covers the top and bottom of the layer and also coats the interior of the hole (i.e. a conductor that extends at least partially into the layer). The holes 32 are located more towards the edge of the layer. Refer to figures 4A-4D, 5A-5C

in Corbett et al that shows backing layer 24 and metal conductive layer 34 extending through holes 32 along with column 4, line 18 through column 5, line 25.

4. Claims 13 and 14 are objected to as indicated in the last office action.

Response to Arguments

5. Applicant's arguments filed October 10, 2005 have been fully considered but they are not persuasive. In response to applicant's arguments that Both Aime and Colbert et al teach the conductors in the backing layer, not the matching layer, the recitation a matching layer has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1772

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
